

CAPABILITIES BRIEF • 2026

AI Operations Intelligence for your business.

One architect. Senior-level thinking. Vendor-neutral.
Built on your needs, your systems, and the latest available tech.

LIVE DASHBOARDS

Real-time ops visibility

PREDICTIVE ALERTS

Failures before they happen

SUPPLY CHAIN RISK

Disruption exposure mapping

EXECUTIVE BRIEFINGS

C-suite signal, not noise

POSITIONING

I architect AI solutions built on your needs and existing systems — and orchestrate the build with the right partners and the latest available tech.

WHAT I ARCHITECT

Capabilities I design and orchestrate to delivery.

LIVE OPERATIONS DASHBOARDS

Real-time visibility into the metrics your operators actually look at — not vanity charts. Designed around the decisions being made.

PREDICTIVE ALERTS & ANOMALY DETECTION

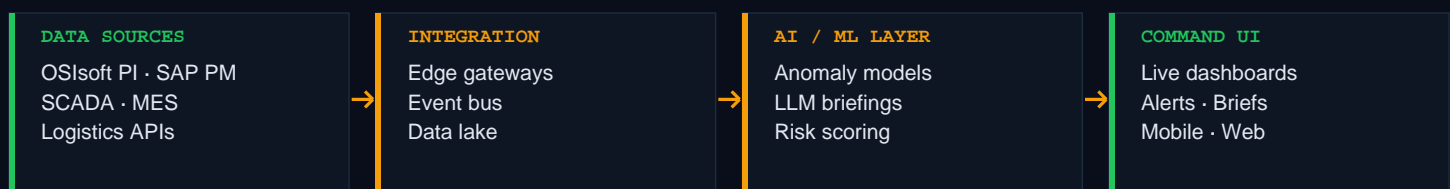

Move from reactive to predictive. Vibration, thermal, pressure, and process drift signals turned into actionable lead time.

SUPPLY CHAIN RISK MONITORING

Geographic, vendor, and corridor-level risk scoring. Inbound shipments, weather, geopolitical, and inventory pressure in one view.

EXECUTIVE INTELLIGENCE BRIEFINGS

AI-generated daily briefings that translate operational signal into board-ready language and recommended actions.

REFERENCE ARCHITECTURE

ENGAGEMENT MODEL

From discovery to handoff. Right-sized to your business.

01

DISCOVERY

1-2 WEEKS

Workshops with operators and leadership. Identify the highest-leverage decisions and the data already available to support them.

02

ARCHITECTURE

2-3 WEEKS

Solution design, integration map, vendor selection, build-vs-buy recommendations. Deliverable: signed-off architecture and roadmap.

03

PARTNER BUILD

8-16 WEEKS

I orchestrate the build with the right specialist partners (data eng, ML, frontend). You get one point of accountability — me.

04

HANDOFF

2 WEEKS

Knowledge transfer to your team or selected MSP. Documentation, runbooks, monitoring. Optional retainer for evolution.

WHY WORK WITH YTS**VENDOR-NEUTRAL**

No platform allegiance. Recommendations based on fit, not commission.

RIGHT-SIZED

Enterprise rigor without big-consultancy overhead. Built for SMB and enterprise alike.

SENIOR-ONLY

You work directly with the architect. No junior offshore handoffs.

BUILT TO HAND OFF

Designed so your team owns it after delivery. No lock-in by default.
